PROFESSIONAL SUMMARY

Flutter and full-stack developer with two years of experience building cross-platform mobile apps and web platforms, from database design through App Store and Google Play release. Builds complete products with Flutter, React, Next.js and TypeScript on Firebase and Supabase backends, including in-app purchases, Stripe payments, AI features and real-time data. Currently building a multi-platform business application and a workforce management platform at DM Worx LLC, alongside freelance full-stack projects for other clients.

TECHNICAL SKILLS

Mobile	Flutter, Dart, iOS, Android, Provider, Riverpod, In-App Purchases, App Store and Google Play deployment
Web	React, Next.js, TypeScript, JavaScript, Node.js, Progressive Web Apps, Responsive UI
Backend & Databases	Firebase (Auth, Firestore, Cloud Functions, FCM, Crashlytics), Supabase, PostgreSQL, Neon, REST APIs, SMTP
Payments & Integrations	Stripe, PayPal, Google Maps, Meta Pixel, GetStream Chat, Google ML Kit, OpenAI/Gemini/Groq APIs
Cloud & Tools	AWS (EC2, Elastic Beanstalk), DigitalOcean, Vercel, Git, GitHub, CI/CD, n8n Automation
Practices	Feature-first modular architecture, role-based access control, code review, cross-device testing

PROFESSIONAL EXPERIENCE

Flutter Developer Apr 2025 to Present
DM Worx LLC, Remote

- Building My Invoice, a multi-platform business product consisting of a Flutter mobile app, a React web portal and a separate admin dashboard, all running on a shared Firebase backend.
- Implemented subscriptions through App Store and Google Play in-app purchases, and client payments through Stripe, with FCM push notifications for payment reminders.
- Integrated the OpenAI (ChatGPT) API to power an in-app assistant for user support and workflow suggestions.
- Built Hudson Tasks (hudsontasks.com), a React and Supabase workforce management platform used by employers to manage field employees, work hours, tasks and finances.
- Introduced feature-first modular architecture and Git-based code review to improve release consistency and reduce regressions across features.

Full-Stack Developer (Contract) Oct 2025 to Dec 2025
Cygnus Ventures, Remote (concurrent with DM Worx LLC)

- Delivered full-stack features with React, TypeScript, Node.js and PostgreSQL in a production codebase, completing all deliverables on schedule.
- Designed and managed relational database schemas on Supabase and Neon to support scalable backend operations.
- Built admin panels and reporting interfaces that consolidated internal workflows and reduced manual oversight for operators.

Flutter Developer Jun 2024 to Feb 2025
Solution Soul, Lahore, Pakistan

- Developed and released multiple cross-platform Flutter apps to the App Store and Google Play, each delivered within agreed client deadlines.
- Implemented Firebase Authentication and Firestore across client projects for secure multi-user access and real-time data sync.
- Built adaptive UI components tested across screen sizes to keep the user experience consistent on Android and iOS.
- Delivered admin panels and client-facing apps end to end, from design handoff to store submission.

Flutter Developer Intern Mar 2024 to Jun 2024
Orbilon Technology, Lahore, Pakistan

- Built Flutter screens and reusable UI components for client-facing products, reviewed and approved by senior developers.

- Implemented Firebase Authentication and Firestore features and managed state with Provider and Riverpod, resolving performance bottlenecks before client delivery.

SELECTED PROJECTS

My Invoice myinvoice.us, In Development
Flutter, Firebase, Cloud Functions, FCM, In-App Purchases, Stripe, OpenAI API, Gemini API, Redis, Firebase Remote Config, Cloudflare Turnstile, Google Maps, React, TypeScript

- End-to-end business workflow: create estimates, get client approval, and auto-convert them into tracked projects with progress management.
- Separate admin dashboard giving operators complete user management with activity logging, alongside control over transactions, invoices, analytics and support chat.
- Built an in-app AI assistant screen powered by OpenAI and Google Gemini APIs, with Redis caching and Firebase Remote Config for performance and feature rollout, secured with Cloudflare Turnstile against bot and abuse traffic.

Hudson Tasks hudsontasks.com
React, Supabase, SMTP

- Workforce management platform for employers and field employees with role-based access and work-hour tracking.
- Task assignment for on-field employees, plus finance management and client follow-up tracking, with automated SMTP email notifications.

Junoon Herbals junoonherbals.com, Freelance
Next.js, Supabase

- Built a complete e-commerce platform with a custom admin panel for full user, inventory and order management.
- Made Meta Pixel configurable from the admin panel and built a live visitor dashboard showing real-time visitors by city and traffic source.

Clika App
Flutter, Firebase, GetStream Chat API

- Tower management system with role-based access for super admins, companies and field employees, plus real-time chat, event and discount management.

Everpure Organics everpureorganics.com
React, TypeScript, Supabase, REST APIs

- E-commerce web app with dynamic product filtering, multi-tier pricing cart, user authentication and a full admin dashboard.

My Madina mymadina.site
React, TypeScript, Supabase, PWA, AWS EC2

- Navigation platform for pilgrims with coordinate-based interactive maps, bilingual English and Arabic support and offline PWA capability.

Realtors Lead realtorslead.com
React, TypeScript, PayPal API

- Lead generation platform for US real estate agents with PayPal payment processing and automated email delivery.

Emotions Controller App
Flutter, Google ML Kit, Python, AWS Elastic Beanstalk

- Real-time on-device emotion detection using Google ML Kit, with deep cloud analysis routed to a Python backend on AWS Elastic Beanstalk.

EDUCATION

Lahore Garrison University 2020 to 2024
BS Computer Science

CERTIFICATIONS & ACTIVITIES

- Flutter Development Certification, NexSkills
- Campus Ambassador, Youth Speak Forum 2023, AIESEC
